

ALIBEK BERIK

AI/ML Engineer · Machine Learning, LLM/RAG Systems & Computer Vision

Kuala Lumpur, Malaysia | alibekberik13@gmail.com | alibekberik.github.io | github.com/AlibekBerik | LinkedIn

PROFESSIONAL SUMMARY

AI/ML student with production experience building AI inference pipelines and a track record of shipping end-to-end ML systems — from SQL feature engineering and XGBoost to fine-tuned transformers and LLM-powered RAG, deployed as live dashboards, REST APIs and Docker containers. Trilingual (English C1, Russian, Kazakh). Seeking an AI/ML or software engineering internship to apply these skills alongside experienced engineers.

EXPERIENCE

AI/ML Engineer · [GlowUp Face](#)

Aug 2026 – Oct 2026

- Engineered and optimised AI inference pipelines integrating open-source **computer vision models** and the **OpenAI API**, processing **1,000+** user facial, skin and hairstyle analysis requests.
- Streamlined backend workflows and prompt-engineering pipelines, reducing image-analysis latency and improving response accuracy for a platform scaling to thousands of active users.
- Collaborated on product architecture and feature deployment, building core ML capabilities from scratch.

PROJECTS

Kazakh Culture RAG Q&A System · [LLM + RAG + Docker](#) · [github.com/AlibekBerik/rag-qa-system](#)

2026

- Designed and built a retrieval-augmented generation pipeline (**ChromaDB** vector search + **Groq LLM** generation, sentence-transformers embeddings) that answers questions grounded in real source documents and cites them.
- Eliminated hallucination on out-of-scope queries through document chunking, semantic embeddings and prompt-constrained generation, then explicitly tested and confirmed correct refusal behaviour.
- Resolved GPU/CPU dependency conflicts to containerise the **FastAPI** service with **Docker**.

Customer Churn Prediction System · [SQL + ML Pipeline + Deployment](#) · live demo on Streamlit Cloud

2026

- Increased churn recall by 68% relatively (**40% → 67%**, AUC-ROC 0.759) by training an **XGBoost** classifier and addressing class imbalance with **SMOTE** at a measured precision tradeoff.
- Engineered RFM features on **800,000+** real transactions with SQL CTEs, joins and aggregations; caught and fixed target leakage; deployed as a live **Streamlit** dashboard.

Sentiment Classifier · [Fine-tuned Transformer + REST API](#) · model on Hugging Face Hub

2026

- Achieved **85.9% accuracy** and a **0.866 F1** score by fine-tuning **DistilBERT** on IMDb reviews; served real-time inference through a **FastAPI** backend with Swagger UI.
- Published the trained model to Hugging Face Hub and documented free-tier hosting constraints transparently.

Malaysia House Price Prediction · [Regression Pipeline](#)

2025

- Improved R^2 from **0.35 to 0.60** (+71%) with custom features (location clusters, estimated total price) and **LightGBM**, with cross-validation and hyperparameter tuning on 5,000+ records.

More: tool-using AI agent (smolagents, web search) · MNIST CNN (97% test accuracy) · spam classifier (~95% accuracy) — all on [github.com/AlibekBerik](#)

EDUCATION

Bachelor in Artificial Intelligence · [Xiamen University Malaysia](#)

Sep 2025 – Aug 2029 (expected)

- CGPA: 3.09 / 4.0 · Coursework: Machine Learning, Neural Networks, Data Structures, Linear Algebra, Statistics

SKILLS

LLMs & RAG

RAG, ChromaDB, sentence-transformers, OpenAI & Groq APIs, smolagents, prompting

ML / Deep Learning

PyTorch, TensorFlow/Keras, HF Transformers, Scikit-learn, XGBoost, LightGBM

Deployment

FastAPI, Docker, Streamlit Cloud, Hugging Face Hub

Data & Tools

Python, SQL, Pandas, NumPy, SQLite, Git, Linux, Jupyter, Google Colab

Languages

English (C1), Russian (fluent), Kazakh (native)

CERTIFICATIONS

- CS50's Intro to AI with Python — Harvard, 2026
- Machine Learning with Python — freeCodeCamp, 2026
- ML in Production — DeepLearning.AI, 2025
- Fundamentals of ML & AI — AWS, 2025
- Supervised Machine Learning — DeepLearning.AI & Stanford
- Linear Algebra for ML — DeepLearning.AI
- Claude Code 101 — Anthropic, 2026
- Digital Skills: AI — Accenture
